

We've recently completed the re-location of our drilling and welding facilities and can now offer the option for locking and a range of standard welded badges with only a 3-5 day turnaround!

Locking is available on the majority of our hinged gratings and covers, providing a theft deterrent or additional security for restricting unwanted access to cables and equipment.

Our standard badging options include of SW, FW, METER & GAS among others, these laser cut steel badges offer a quick and cost effective solution to your badging requirements. We can also offer bespoke badging within our size parameters on a longer lead time.

If you require quotations or answers to any queries, please contact us to talk about your requirements.
